

Dear Valuable Clients/Partners,

We would like to share more detailed market information about Xian-Vilnius rail service.

Present situation is very challenging, due to lack of wagons/space to Vilnius and its unbalancing the service all of us would like to grant.

Presently Vilnius rail service is based on **Tuesdays/Fridays departure trains**, that originally goes to **NEUSS**(Germany), with possibility to stop/drop the Vilnius containers at **VAIDOTAI** rail station.

Only 45 wagons for 50 containers in total per departure, which is shared 41 to NEUSS and only 4 left to Vilnius. We can clearly see how tight is space available to Vilnius offered to the all market.

Such lack of wagon situation valid for every coloader and also out of our expectation.

The GOOD NEWS are, that **from 18.09.2020**, independent Vilnius train service is expected to launch with space of 50 per one each Fridays departure, that will stabilise the new growing service and attract more the market.

Stay tuned for further updates!
